

THE LAKE HELEN NEWS

LAKE HELEN, FLORIDA, NOVEMBER 8, 1906.

MRS. IRENE G. ADAMS, Editor.

WORKED GAME ON BOYS.

Lake Heleites Fed them and Prevented Mischief.

Halloween was hallowed in the memories of the public school pupils by a chicken pillau feast on the school grounds. The children secured the chickens and rice, built a camp-fire and then proceeded to enjoy games, while the teachers, Miss Mann and Miss Purdy, presided over the savory caldron. The pillau was declared a success. A number of parents were present and the occasion knit the ties between instructors and pupils a little closer. When the feast was over the boys were in too good humor to seek mischief, hence the homes of the two reverends were the only ones that showed witches had been abroad; the woodpile of one took a tumble and a gate from the other climbed a tree. If parents and teachers helped the "kids" oftener to have a good time there would not be so much disreputable conduct to complain of from our young folks.

Enjoyable Dancing Parties.

The impromptu dancing parties held Friday evenings have been so enjoyable that the young people have arranged for a more elaborate affair this Friday, with an orchestra from DeLand, and a prospect of guests from neighboring towns. Mrs. Davenport furnished piano music last week, twelve couples were present. No Florida town has a lovelier hall for dancing, or for any other entertainment, than Library Hall, in this city.

From a Storm Sufferer.

Mr. Crowes has received a letter from his cousin, who was one of the victims of the tornado that destroyed so many lives among the Florida Keys recently. He relates a most miraculous escape from death, after being carried out to sea on bits of wreckage to which he clung for more than 100 miles. He was rescued by a ship bound for New York and hopes to entirely recover from the effects of his awful experience.

Mr. Nivens is supplying fresh oysters every Friday, he gets fish when possible to secure them, but the demand is greater than the supply; this difficulty has always prevented residents of the interior from enjoying the bounties with which the Atlantic abounds. If Smyrna would develop the fish industry, as Sebastian and other smaller towns have done, the ocean at our doors would yield luxury and revenue.

Ed. Brown has been at his cottage on Coronado Beach since spring and has salted several hundred pounds of bass which retail readily from the local stores. They are as fine as any salted fish on the market.

The grunt of the hog and the track of his proboscis may be traced through the sidewalks of this city, to the ruin thereof, and to the disgust of every decent citizen. The thought is antagonistic to the creed of the News, but to the humble property holder it occurs that the exclusion of stock from the towns, highways and private enclosures of Florida might confer more practical benefits than the draining of the everglades. There is not the least evidence that the swine into which the devils were cast

There is no Reason why your baby should be thin, and fretful during the night. Worms are the cause of thin, sickly babies. It is natural that a healthy baby should be fat and sleep well. If your baby does not retain its food, don't experiment with colic cures and other medicines, but try a bottle of White's Cream Vermifuge, and you will soon see your baby have color and laugh as it should. Sold by all Druggists.

centuries ago did not swim to the shore and migrate to Florida, and their progeny are here today.

Mrs. Burke and daughter arrived Saturday and are entertained at the Weaver domicile until their pretty bungalow is completed. Mr. Mace sub-let the contract of its construction to the Haven Bros., of DeLand, who have experienced many delays because of the slow arrival of material.

Mrs. Kate D. Clarkson has issued invitations to the marriage of her daughter, Alberta, to D. Spencer Stricklin, Wednesday, November 21, at eleven a. m. in Blake Memorial church, Lake Helen.

Among those who went to Jacksonville for the carnival this week are Mr. and Mrs. Araby Clarkson, Mr. and Mrs. A. H. Pelton and Mrs. C. B. Pelton.

Percy Hazel went to St. Augustine Saturday in response to a telegram from the East Coast Railway asking him to report there to accept a position as station agent. He was stationed for the present at Cocoa but goes to Palm Beach later.

Ad. Noble went to Tampa last week, Wednesday, for a vacation visit. No one has more faithfully earned a vacation than Mr. Noble.

Mr. Blane, a Huguenot gardener of extensive experience, who has drifted from his profession to work in orange groves, is raising some very promising celery here.

Mrs. Ann Stevens has returned to her lovely suburban home for the winter.

Mr. and Mrs. Columbus McKinzie are preparing to build an addition to their residence north of town.

The local nimrods report an unusual number of deer in the forests on Deep Creek, and that a number have been killed this week.

Mrs. Compst purchased the fine family driving horse, Harry, of Mr. C. P. Pelton; consideration \$200.

Jay Sheldon is visiting his mother, Mrs. Davenport.

The streets are having a new carpet of pine straw and everyone is polishing their premises, from force of habit, and not from expectation of tourists, for there is no accommodation in town for strangers unless a manager is secured for the hotel.

Dr. O. B. Webster is home for a brief visit.

Prof. and Mrs. Westlake returned last week rejuvenated and refreshed by more than three months of change of associates and scenes.

Mr. Russell has not been gaining any of late, and was quite sick a few days last week.

The Misses Mann, Purdy and Barker hired a team, and in true "new woman" style drove to DeLand Sunday afternoon to attend vespers service at the University.

William Glasgow has returned to school after being laid up several weeks with an injury to his knee caused by jumping on to a piece of glass which made a dangerous gash.

Many boxes of grapefruit have been shipped from our station the past week; they are dropping so badly that it is probably economy to ship early.

Mrs. Adams is very proud of the first lunch of bananas that

Always was Sick. When a man says he always was sick—troubled with a cough that lasted all winter—what would you think if he should say—he never was sick since using Ballard's Horehound Syrup. Such a man exists.

Mr. J. C. Clark, Denver, Colorado, writes: "For years I was troubled with a severe cough that would last all winter. This cough left me in a miserable condition. I tried Ballard's Horehound Syrup and have not had a sick day since. That's what it did for me." Sold by all Druggists.

ever ripened on her place, there are more to follow, and even if no fruit formed, the plant has the most tropical appearance of any that grows in this latitude. Everyone should grow them for their beauty.

PILLARS OF WOOD AND IRON.

Metal Tablets Indicate Southern Limit of British Territory.

Nearly all the boundaries of the United States are formed by the easy, irregular lines of waterways. The artificial marking of a country the size of this would seem a gigantic task, and fortunately it was not necessary all the way around.

Along the northwestern border, however, there is a vast distance where something of the sort was required, although it is doubtful if many persons have ever heard of it.

A glance at the map of the United States shows that its boundary adjoining Canada follows, the larger part of the distance, an irregular water-line formed by the Great Lakes and their outlets.

Thence from the Lake of the Woods, on the north of Minnesota, a more direct course is taken through the wilderness and over the mountains of the wild West to the Pacific Coast.

This boundary between the countries is marked at regular intervals by pillars of wood and iron, with mounds, or stone cairns.

Beginning at the Lake of the Woods, cast iron pillars have been placed alternately by the English and our government, one mile apart, until reaching the Red Valley. Those set by our neighbors were brought from over the ocean, while ours were made in Detroit. They are a hollow casting of a pyramidal form, eight feet in height, having a base eight inches square and a top flange one inch in thickness. It is a top four inches square, supported by a solid cap.

Into these hollow posts are fitted seasoned cedar joists, with spikes driven through apertures made for that purpose in the center of the length of the pillar. One-half of the length of the pillar is firmly imbedded in the ground. In raised letters two inches high, face the north and south, the first reading, "Convention of London," the latter "October 25th, 1818."

Along the Red River, each pillar is made of stone, seven feet high, generally placed on the boundary line. Whenever wooden pillars are used, they are of the same height as the iron pillars and painted above the ground.

Through forests a clear path has been made a red wide, so that the pillar is plainly indicated. When the pillars of water are crossed, mounds of stone have been raised several feet above high tide.

Over the mountains, shafts of granite, like grim sentinels, guard a way. Altogether the fixing of boundary marks was expensive, but it was worth it.

Croup. A reliable medicine and one that should always be kept in the home for immediate use is Chamberlain's Cough Remedy. It will prevent the attack if given as soon as the child becomes hoarse, or even after the croupy cough appears. For sale by all Druggists.

WHY DO

FOX TYPEWRITERS

Stand so high in the estimation of those using them?

THE ANSWER IS

**Simplicity
Ease of Action
Speed and
Durability**

In addition to the regular models we are delivering

Well Served

Roast meats means something more than being well roasted. The roasts to begin with must be what we call

"Prime Roasts"

When you get that kind and the cook knows what to do with it you're sure of a roast to please an epicure.

You supply the cook, and we will supply the "prime roasts." We've made it a study and don't make mistakes.

JOHN B. STETSON UNIVERSITY,

Four Colleges and Five Technical Schools.

DeLAND, FLORIDA,

AFFILIATED WITH THE UNIVERSITY OF CHICAGO.

COLLEGE OF LIBERAL ARTS.—The standards are those of the University of Chicago. Students receive their degrees from both Stetson and Chicago. See the Chicago and Stetson Catalogs.

COLLEGE OF LAW.—Graduates of this College are admitted to practice law in Florida without examination.

COLLEGE OF TECHNOLOGY AND SCHOOL OF MECHANICAL ARTS.—Mechanical, Electrical Engineering and Manual Training courses leading to degrees. Fine new building, costly equipment.

COLLEGE OF BUSINESS.—Ranking in all its branches. Book-keeping by best methods, shorthand and typewriting. Elective courses open in other Departments. Large faculty and commodious building.

PREPARATORY ACADEMY.—Graduates prepared to enter Harvard, Yale, Princeton, Cornell, Michigan, Chicago, and all first-class colleges.

NORMAL AND MODEL SCHOOLS.—1. Kindergarten in its own building. Primary and Grammar School in separate building. These schools especially prepare Public School teachers.

MUSIC SCHOOL.—A \$10,000 pipe organ, 40 dozen pianos, separate building, large faculty, thorough courses of study.

ART SCHOOL.—New studio. Costly casts, models, etc.

Stetson has a faculty of 48 professors and instructors. They hold degrees from the University of Chicago, Harvard, Yale, Dartmouth, Columbia, University of Pennsylvania, Bryn Mawr, Bucknell, University of Michigan, Denison, and other Universities. There are over \$300,000 in buildings and equipment, nearly \$250,000 endowment; an endowed library of over 12,000 volumes; a beautiful chapel with costly furnishings, including stained glass windows, 7 oil paintings; a \$50,000 pipe organ; a gymnasium with complete apparatus; an enclosed Athletic Field, running track, tennis courts, baseball diamond and grounds; several large museums and shops; electric lights, electric heat, steam heat, cement walks, shell roads, broad avenues, spacious campus, shrubbery and trees; social, literary, musical and other students' clubs; star lecture courses; Christian and non-sectarian teaching. The location is beautiful and healthful, and the expenses are low.

For catalogues, views, folders and information address the President,
